Rhino Compatibility / Product Identity Review

Remaining question only

The completed team worksheet resolved nearly all compatibility review. This revision removes the 38 already-approved fit relationships and the resolved Automatic Feed Clamp question.

Only the Saw Vice Plate Set catalog identity still prevents the final two compatibility edges from being migrated.

Reviewer(s) / role	Technical + Product Owner / Shopify catalog owner
Review date	_____

Already confirmed - do not answer again

- All 38 previously proposed compatibility relationships were approved.
- Automatic Feed Clamp is one physical part that fits both SawMaster 18 and SawMaster 24; the historical part numbers differ for another reason.
- Saw Vice Plate Set consists of two physically different sets - one for SawMaster 18 and one for SawMaster 24 - and the team said Rhino should sell them separately.

Saw Vice Plate Set - choose the catalog split

What should happen to the existing combined Shopify product?

The current single product cannot safely represent both distinct physical sets. Choose the cleanest intended catalog state.

[✓] Keep existing product as SawMaster 18 set; create a new SawMaster 24 set [ ] Keep existing product as SawMaster 24 set; create a new SawMaster 18 set [ ] Create two new products and retire the combined product [ ] Other - describe below [ ] Needs discussion

_____

_____

Customer-facing names

Are these names acceptable for the two separate products?

[✓] Saw Vice Plate Set - SawMaster 18 AND Saw Vice Plate Set - SawMaster 24 [ ] Correct names below [ ] Needs discussion

_____

_____

Historical part-number identity

Please confirm the intended mapping before any compatibility migration.

[✓] BK-450-24 = SawMaster 18 set; BK-600-24 = SawMaster 24 set [ ] Correct mapping below [ ] Unknown

---

Anything else that differs between the two sets?

Only note differences that matter for the sellable product (for example included hardware or physical dimensions). Commercial price/inventory can be handled later.

[ ] No additional technical difference to record [ ] Yes - describe below [ ] Unknown

What happens after this worksheet

The 40 already-resolved compatibility edges can move forward independently. The two Saw Vice Plate Set edges stay blocked until the catalog split has exact Product identities.
